corporate profile

Azure Dynamics Corporation is a world leader in the development and production of hybrid electric and electric components and powertrain systems for commercial vehicles. Azure is strategically targeting the commercial delivery vehicle and shuttle bus markets and is currently working internationally with various partners and customers. The Company is committed to providing customers and partners with innovative, cost-efficient, and environmentally-friendly energy management solutions.

2009 highlights

- Purolator Courier Ltd. placed an order for an additional 200 Balance™ Hybrid Electric delivery trucks. The 200 unit purchase was Azure's largest revenue order to date and also the highest volume Balance™ Hybrid Electric order. The new trucks join approximately 205 other Azure trucks already at work in Purolator's fleet.
- Johnson Controls-Saft was chosen as the battery supplier for Azure's Force Drive™ integration on the Ford Transit Connect Electric and will supply its advanced lithium-ion technology for distribution beginning in late 2010. The Transit Connect Electric is the first of four electric vehicles to be built on Ford's global vehicle platform.
- FedEx Express purchased 51 additional Azure Balance™ Hybrid Electric walk-in vans to be delivered in November and December 2009. Most of the 51 vehicles will be put into service at the first FedEx Express all-hybrid facility in Bronx, N.Y.
- Azure Dynamics received an order from the Kidron division of VT SVC for 248 LEEPT™ Freeze systems. The systems were ordered by Idealease Inc., on behalf of its client Schwan Food Company. The 248 systems is the largest single LEEPT™ Freeze order to date.
- Azure Dynamics and Ford Motor Company jointly announced a collaborative effort to deliver a pure battery electric Ford Transit Connect for the North American market in 2010. Azure will integrate its Force Drive™ battery electric drive train in the Transit Connect van for commercial fleet use.
